PREFATORY NOTE

THIS seventy-seventh yearly issue of THE ENGLISH CATALOGUE OF BOOKS comprises the titles (under authors, and subjects or titles) of works published during 1913, and also of some received too late for inclusion in the seventy-sixth issue.

The main entry for each book begins with the author's surname (if known) in **heavy type.** As an index to these "Author" records, entries are also made under the titles, commencing with their most important words (which usually indicate the *subjects* with which the books deal), or with the first words; the name or word under which the main entry appears is printed in *italics* in these index entries, thus giving a reference to the place where the full information about a book may be found. Main entries and index entries are in one alphabet.

Writers with compound names are entered under the first part of the name, *e.g.*:—

Baring-Gould (Sabine)

and accordingly must be looked for in that order. References are also made, however, from the last part of the name.

The publications of learned Societies are recorded in an Appendix.

The names and addresses of the Publishers of Great Britain and Ireland, followed by those of the principal publishers in the United States and Canada, will be found at the end of the volume. The telegraphic and cable addresses and telephone numbers have been added when known.

Following the Preface is an analysis of the books of the year 1913, showing in detail the number of works in each class of literature, and giving the proportions of new books, translations, pamphlets, and new editions.

Hearty thanks are due to many publishers, secretaries, librarians, authors and bibliographers who have assisted in making this book more correct and comprehensive than it would have been otherwise.

The Editor will be glad to have particulars (author, title, size, price, publisher, and month of publication) of any work which may have been omitted. Information regarding each book should be given on a separate slip of paper or postcard. It should be addressed to *The Editor of* THE ENGLISH CATALOGUE OF BOOKS, "Publishers' Circular" Office, 19, Adam Street, Strand, London, W.C.

JAMES DOUGLAS STEWART.

January, 1914

ANALYSIS OF BOOKS

PUBLISHED IN 1913

THE number of books recorded as having been published during 1913 is 12,379, an increase of 312 on the total for 1912. The monthly figures given in the second part of the appended analytical table show that the rate of production during the year has been fairly steady from month to month, with the exception of the comparatively empty months of August and December. October, as usual, holds first place with the total of 1,696, although this figure falls short by 44 of the record total noted last year. January has also come into the forefront as a busy month.

For the past three years this statistical table has been constructed on the lines of the classification scheme laid down by the International Congress of Librarians at Brussels in 1910, so that a comparison of the numbers of books published in each class of literature this year and last year is possible. The principal *increases* this year as compared with 1912 are to be found in the following classes :—Religion, 91; Sociology, 216; Law, 15; Technology, 113; Medicine, etc., 38; Agriculture, etc., 61; Business, 32; Games, etc., 22; Fiction, 40; History, 32; and Travel and Geography, 144. The principal *decreases* are Science, 95; Domestic Arts, 54; and Juvenile, 137. It should also be noted that while the total number of publications has increased by 312, the number of new editions has decreased by 32. It should be noted that in the above classes "Education" includes only books about educational theory and practice, and not text books on special subjects, which are classed elsewhere; and also that under "Music" only works about music are recorded.

Large though the yearly total now is, it would be possible to swell it to a much greater figure by counting numerous leaflets (Government and other), ephemeral pamphlets, the publications of Borough Councils and other local government bodies, and musical texts. The latter alone would account for some thousands. As examples of the manner in which the publishing activity of a country may be entirely misrepresented by the counting of all sorts of ephemeræ, it may be mentioned that the yearly totals for Japan and Russia for 1908 are given as 36,046 and 23,852 respectively.

While it is thus obvious that our total could be increased greatly by the inclusion of all this literary protozoa, the figures would not represent so accurately the book publishing activity of the United Kingdom.

The totals for the last ten years show the striking development of British publishing :—

Year.	New books.	New editions.	Total.
1904	6,456	1,878	8,334
1905	6,817	1,435	8,252
1906	6,985	1,618	8,603
1907	7,701	2,213	9,914
1908	7,512	2,309	9,821
1909	8,446	2,279	10,725
1910	8,468	2,336	10,804
1911	8,530	2,384	10,914
1912	9,197	2,870	12,067
1913	**9,541**	**2,838**	**12,379**

In the following tables each book is counted as one, whether it is in one or more volumes. Serials that appear later as a collected volume are counted as an ordinary book on the appearance of that volume; so that, for example, the series of "Statutory Rules and Orders" issued by the Government, and amounting to several hundred in the year, are counted as one item on the appearance of the annual collected volume. The same rule applies to volumes of magazines, etc.

The analytical tables appended supply further detailed information regarding the year's publishing.

Iron and Steel Institute, 28, Victoria Street, London, S.W. G. C. Lloyd, *Secretary*

Journal, Vol. 87, No. 1, 1913, 8vo., pp. 774, 16s. Contents:—Critical ranges of pure iron, with special reference to the point A2, by Dr. H. C. H. Carpenter; Influence of the metalloids on the properties of cast iron, by H. I. Coe; Economy of dry blast, by Prof. J. von Ehrenwerth; Corrodibility of nickel, chromium, and nickel chromium steels, by Dr. J. Newton Friend, J. Lloyd Bentley and W. West; Influence of silicon on the corrosion of cast iron, by Dr. J. Newton Friend and C. W. Marshall; Influence of the presence of sulphur upon the stability of iron carbide in the presence of silicon, by W. H. Hatfield; A new form of electrically-driven, two-high, continuous-running, reversing mill, by Andrew Lamberton; Studies in the cold flow of steel, by Percy Longmuir; Rolling-mill practice in the United States, Pt. 2, by Dr. J. Puppe; Faults in present-day furnaces and their remedies, by Alleyne Reynolds; A new method for accurate determination of phosphorus, by C. H. Ridsdale and N. D. Ridsdale; Tenacity, deformation, and fracture of soft steel at high temperatures, by Walter Rosenhain and J. C. W. Humfrey; Chromiferous iron ores of Greece, by Herbert K. Scott; Production of sound steel by lateral compression of the ingot whilst its centre is liquid, by B. Talbot....SPON

Journal, Vol. 88, No. 2, 1913, 8vo., pp. 780, 16s. Contents:—Reinforced pile foundations for blast-furnaces, by Armand Baar; Some experiments of the effect of heat treatment on the colorimetric test for carbon in a 0.32 carbon steel, by Prof. E. D. Campbell and F. D. Haskins; A method of preparing sections of fractures of steel for microscopic examination, by Prof. A. Campion and J. M. Ferguson; The manufacture of coke in Belgium, by Baron E. Coppée; The manufacture of armour-piercing projectiles, by Gen. L. Cubillo; The electric refining of steel in an induction furnace of special type, by Otto Frick; Commercial production of sound steel ingots, by Emil Gathmann; The distillation of tar in metallurgical practice, by Gevers-Orban; The use of coke-oven and blast-furnace gases in Metallurgy, by E. Houbaer; Present methods of testing, with special reference to the work of the International Association for Testing Materials, by Prof. H. Hubert; A historical survey of the metallurgy of iron in Belgium, by Baron E. De Laveleye; So-called 'crystallisation through fatigue,' by F. Rogers; The allotropic transformations of iron, by Prof. A. Sauveur; A new method for the determination of the critical points Ac_1 and Ar_1, by Dr. J. E. Stead; The crystallising properties of electro-deposited iron, by Dr. J. E. Stead and Prof. H. C. H. Carpenter; Modern open-hearth steel furnaces, by Benjamin Talbot; The use of oxygen blast-furnaces, by Gustave Trasenster; Note on the principal deposits of iron ore in Chili, by C. Vattier .....SPON

Carnegie Scholarship Memoirs, Vol. 5 (1913), 8vo., pp. 168, 10s. Contents:—Preservation of iron, by J. Newton Friend; Development of the drill test as a means of ascertaining the machining properties of iron and other metals and for the investigation of tool steels, by A. Kessner; Investigation of liquid contraction in cast iron, by George Hailstone; Estimation of oxygen in iron and

steel, by J. A. Pickard; Influence of intercrystalline cohesion upon the mechanical properties of metals, by J. C. W. Humfrey; Study of the constitution of carbon molybdenum steels, with an Appendix on the mechanical properties of some low molybdenum alloy steels, by Thomas Swinden

Mining and Mechanical Engineers (The North of England Institute of), (founded in 1852, and incorporated by Royal Charter in 1876), Neville Hall, Newcastle-upon-Tyne. Mr. William Cuthbert Blackett, *President*; Mr. John Herman Merivale, *Honorary Secretary*; Mr. Lawrence Austin, *Secretary*. Subscriptions: Members and Associate Members, annually, 42s.; Associates and Students, 25s.
The Papers read before the members are published in the Transactions of The Institution of Mining Engineers, London, price 72s. per annum (2 vols.).
Separate special publications: Annual report, 1912–1913; and Report of the committee appointed to report upon the carboniferous limestone formation of the North of England, with special reference to its coal resources

Mining Engineers (The Institution of), Albany Buildings, 59, Victoria Street, Westminster, London, S.W. (established in July, 1889). Comprising the North of England Institute of Mining and Mechanical Engineers, the Midland Counties Institution of Engineers, the North Staffordshire Institute of Mining and Mechanical Engineers, the Midland Institute of Mining, Civil, and Mechanical Engineers, the South Staffordshire and Warwickshire Institute of Mining Engineers, the Mining Institute of Scotland, and the Manchester Geological and Mining Society. Papers read before any of these Institutes are published in the Transactions of the Institution of Mining Engineers. Dr. W. E. Garforth, *President*; L. T. O'Shea, M.Sc., *Hon. Secretary*; Percy Strzelecki, *Assistant Secretary*.
Transactions of the Institution of Mining Engineers, Vols. 44 and 45 (price 36s. ea.), containing Papers as follows:—Geology: The South-Eastern coal-field, the associated rocks, and the Buried Plateau, by Prof. W. Boyd Dawkins; A Boring for coal at Claverley, near Bridgnorth, and its bearing on the extension westwards of the South Staffordshire coal-field, by Dr. Walcot Gibson; The Jherria coal-field (India) and its future development, by George Harold Greenwell; The New Rand goldfield, by A. R. Sawyer; Notes on the geology of Shansi, and the coal industry of Northern China, by Noah T. Williams. Mining Engineering: Rearer workings at Podmore Hall collieries, with special reference to alluvium saturated with water, by William Barber; Suggestions on the development of new colliery districts, with special reference to the support of the surface, by Hubert Bradshaw; Reinforced concrete in mines, Prof. S. M. Dixon; The Relation between subsidence and packing, with special reference to the hydraulic stowing of goaves, by George Knox; The Hydraulic stowing of goaves, by George Knox; Some experiences with winding-ropes and capels, by W. D. Lloyd; The Use of old wire ropes in timbering roadways, by John McLuckie; A New mining dial, by Frederick P. Mills; Maltby main colliery, by Alfred Thompson. Mechanical Engineering: Notes on haulage clips in use in North Staffordshire, by W. G. Salt and A. L. Lovatt; The Generation and use of compressed air for mining, by George Blake Walker. Electricity: Colliery cables, by W. T. Anderson; Electrically-driven winding-engines in South Africa, by A. W. Brown; Some novel devices in connexion with electrical pumping installations in mines, by Dr. R. Herzfeld; Electricity, a short paper addressed to colliery managers, by Robert Nelson; The Electrification of Cannock Chase colliery, by S. F. Sopwith; Insulated and bare copper and aluminium cables for the transmission of electrical energy, with special reference to mining work, by Burkewood Welbourn; Miners' electric safety lamps. Coal-dust, Fire-damp and Mine Gases, explosions, safety lamps, and ventilation: An Address to practical men, being some further notes on The Combusion of oxygen and coal dust in mines, by W. C. Blackett; Improvements relating to the anemometer and hygrometer by Henry Briggs; A Record of the origin of the principle of stone-dusting for the prevention of colliery explosions, by Dr. W. E. Garforth; The Hailwood gas-cap observation-machine, by E. A. Hailwood; The Effects of deficiency of oxygen on the light of a safety-lamp, by Drs. J. S. Haldane and T. Lister Llewellyn; Gob-fires and the prevention of gob-fires in mines, by Dr. John Harger; Fire-damp in coal-mines, by Dr. John Harger; The Prevention of misfires and of accidents in blasting operations, by J. S. King; The Slow combustion of coal-dust and its thermal value, by F. E. E. Lamplough and A. Muriel Hill; Natural history of coal and coal-dust, by James Lomax; Facts and theories relating to fans by David M. Mowat; Small coal and dust: its production, prevention, treatment, and utilization, with special reference to dry mines, by J. Drummond Paton; Underground fires, by Henry Rowan; The Lighting efficiency of safety-lamps, by T. A. Saint; The Bellevue explosions, Alberta, Canada—an account of, and subsequent investigations concerning, three explosions produced by sparks from falls of roof, by John T. Stirling and Prof. John Cadman; Notes on gob-fires near Ashby-de-la-Zouch, Leicestershire by Thomas Stubbs; The Ignition of coal-gas and methane by momentary electric arcs, by Dr. W. M. Thornton; The Testing of fans—a plea for standardized test conditions, by John Watson; An Investigation into the effect of atmospheric pressure on the height of the gas-cap, by C. J. Wilson; Report by the Committee appointed to test Mr. Henry Briggs's conclusions in his paper on testing for fire-damp and black-damp by means of a safety-lamp; Miner's electric safety-lamps, self-registering water-gauges. Mine-rescue appliances: The Re-opening of Norton Colliery with self-contained breathing-apparatus after an explosion, by J. R. L. Allott; Mine-rescue appliances—a danger occurring in the use of apparatus in which an injector is employed, by Prof. John Cadman; Some recent experiments with internal pressures in pneumatophors, by Harold C. Jenkins. Miscellaneous: Memoir of Thomas Walter Benson, by W. J. Benson; Memoir of Cuthbert Berkley, by R. W. Berkley; The Taxation of mines in various countries, by David Bowen; Notes on the effect of temperature in mines in Great Britain, by

APPENDIX

Prof. John Cadman; illumination at the coal-face, with special reference to the incidence of miners' nystagmus, by Dr. T. Lister Llewellyn; A Photographic method of rapidly copying out pay-notes in use at Throckley Coll eries, by T. V. Simpson and G. W. Bell; Recent Legislation in relation to land and mines, by Alexander Smith; List of fatal and non-fatal explosions of fire-damp or coal-dust and barometer, thermometer, &c., readings for the year 1912, by Percy Strzelecki.

Most of the papers included in the above volumes are also issued separately as pamphlets.

Proceedings of the general meetings for scientific business, 1913, Pt. 1, 24s.; Pt. 2, 24s.

Zoological record, Vol. 49 (1913), 40s.

DIRECTORY OF PUBLISHERS

Publishers are invited to send us their Telegraphic Addresses and Telephone Numbers. Those sent will be found below between square brackets [ ], and separated from each other by a semicolon (;) The Editor will be glad to be notified of any inaccuracy in the following lists for correction in subsequent volumes.

This list of Publishers, with their Addresses, has been compiled principally with a view to supplying information regarding the books in the English Catalogue. This will explain the inclusion of some firms in the list who can scarcely, in the strict acceptation of the term, be called Publishers, since the publication of books forms only an occasional part of their business.

ABERDEEN UNIVERSITY PRESS, Upperkirkgate, Aberdeen.

Office: 19, Adam Street, Strand, London, W.C.

Two indispensable works of reference

THE ENGLISH CATALOGUE OF BOOKS 1906-1910

Royal octavo 1500 pages
Half-bound in best sealskin.
Price £4 14s. 6d. net.

THE ENGLISH CATALOGUE OF BOOKS 1801-1836

The published volumes of the ENGLISH CATALOGUE OF BOOKS do not go back beyond the year 1836. Librarians, bibliographers and booksellers have always found the English books covering the earlier part of the Nineteenth Century, 1801—1836, the most difficult to trace, the trade catalogues for that period being very incomplete as regards the total number of entries, and insufficient as regards the individual entry.

A volume of the English Catalogue, covering the period in question on modern lines, is now being compiled from the weekly and other trade lists, and other sources—the author, title, and subject entries in one alphabet—supplying as far as possible all the information which is wanting in the "London" and "British" Catalogues.

EDITED AND COMPILED BY

ROBERT ALEXANDER PEDDIE

AND

QUINTIN WADDINGTON

Price £4 4s. net.

JOHN LONG LTD

Messrs John Long Ltd would bring before the favourable notice of the public the following important series of books published by them:

JOHN LONG'S POPULAR NOVELS

A series of entirely new 6s. Novels by the leading authors of the day. The series is generally acknowledged to be the most popular in the publishing world. Crown 8vo. Average length, 352 pages.

These Novels are issued simultaneously in John Long's Colonial Library in cloth and paper, for circulation only in India and the British Colonies.

JOHN LONG'S HAYMARKET NOVELS

A series of handsome 2s. 6d. copyright Novels, which, in their more expensive form, have achieved marked success. Crown 8vo, 300 to 352 pages.

JOHN LONG'S FAMOUS SHILLING SERIES

Books of exceptional merit only are included in this series, which is considered the most popular of its kind on the market. The volumes are crown 8vo in size, and contain about 320 pages each. Cover in colours.

JOHN LONG'S SEVENPENNY NET (Cloth) NOVELS

A new series of copyright Novels which, in more expensive form, have achieved marked success. They are printed in clear type on good paper, tastefully bound in red cloth, full gilt back, with attractive pictorial wrapper in three colours. Each volume has a decorative title-page with frontispiece, both on Art paper.

JOHN LONG'S NEW SIXPENNY (Paper) NOVELS

A series of tasteful reprints selected from the best fiction in each year. The series is world famous. Large demy 8vo, sewed. Attractive cover in colours.

JOHN LONG'S CARLTON CLASSICS

The cheapest and best produced series ever published. Newly set in clear, new type, and printed on the best opaque paper. Each volume contains a special biographical introduction by the Editor. Size, 6 in. by 4 in. by ½ in. Length, 160-320 pages. Prices: cloth, 6d. net; leather, 1s. net. FORTY-TWO VOLUMES NOW READY.

JOHN LONG'S SHILLING NET (Cloth) NOVELS

Crown 8vo, cloth, gilt, wrappers in three colours.

JOHN LONG'S GENERAL LITERATURE

Works in Biography, Memoirs, History, Geography, Travel, Sport, Poetry, Drama, etc., etc. (See Catalogue for prices and particulars.)

JOHN LONG, Ltd., 12, 13 & 14, Norris Street, Haymarket, London.

Telegrams and Cables: "Longing, London." Telephone No. 9313 Central.

Messrs John Long's Complete Catalogue is now ready, and will be sent post free to any address.

THE ENGLISH CATALOGUE OF BOOKS

is now published at the office of The Publishers' Circular, Ltd., and all orders, whether for current or back volumes, should be sent to the following address:—
